BANLAW

UNIFY YOUR FUEL SUPPLY

BANLAW FUELTRACK™

YOU CAN'T MANAGE WHAT YOU CAN'T MEASURE

Being able to secure and track fuel and fluid use is vitally important, particularly with high fuel prices. **Banlaw FuelTrack™** puts you back in control with precise monitoring, reconciliation and centralised reporting of any machine or vehicles' fuel or fluid use.

Banlaw's unique, electronic fuel monitoring system provides a secure, efficient and user friendly way to automatically measure and report on the use of fuel and other costly fluids. It is particularly useful for the mining, rail, and heavy transport industries where fuel loss is an expensive problem.

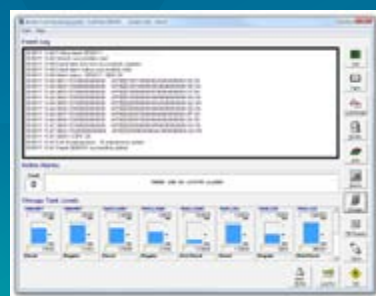

Banlaw FuelTrack™ will assist your business with:

- Fuel security
- Stock reconciliation
- Maintenance scheduling
- Cost analysis
- Calculation of burn rates
- Fuel ordering

The system comprises:

- Depot console to monitor and record fuel or fluid distribution data at each refuelling point
- A range of vehicle auto ID systems including:
 - Direct dry break nozzle connection
 - Smart cards
 - Smart-keys
 - Splash-fill RFID
 - ID and keypad entry
- A Windows based application for system configuration, management and reporting

Banlaw LevelTrack™

Banlaw FuelTrack™ FMS can integrate with automatic tank gauging equipment to eliminate the need for manual level measurement and aid with fuel reconciliation.

BE IN CONTROL. SAVE MONEY.

Banlaw FuelTrack™ is a powerful money saving, management tool, particularly given increasing fuel prices. Site wide reconciliation means individual business units are now accountable for managing fuel usage and fuel costs.

Our clients are achieving fuel accountability of up to 99.9% which translates into major business savings.

**BANLAW'S PATENTED AUTO ID
HARDWARE PROVIDES A FULLY
INTEGRATED SOLUTION, MORE
ACCURATE AND SECURE THAN
ANY OTHER**

Hi-speed Dry Break
Refuelling

Banlaw FuelTrack™ has Australian Governments National Measurement Institute (NMI) certification.

With Banlaw FuelTrack™ you can achieve:

- Precise, automated monitoring of fuel and other hydrocarbons
- Fuel security

- Suitable for one or multiple sites and multiple users
- The system can grow with your needs
- Integrates with ALL ERP business systems
- Full installation and technical support
- Australian designed and built to withstand the harshest operating conditions

WHY BANLAW?

Banlaw is an Australian company with more than 30 years experience in the research, development, design and manufacture of quality fluid transfer products, systems and services.

Banlaw are the only specialist OEM globally to design and manufacture both Fuel Management Systems (FMS) and Auto ID Refuelling hardware. This fully integrated system is designed from the start, with the end in mind and this is evident in accuracy and user friendliness.

Banlaw's products are ergonomically designed to always be easy to handle and safe to use. All fittings are manufactured from high quality materials to exacting standards, while all electronics are assembled and tested to ensure they are as robust as the task is harsh. Banlaw's products are built tough, to help you to perform in the toughest of operating environments.
